

Clarity Multimedia Custom Course Creator for 4.0

C₃ for 4.0

What is Clarity C3 for 4.0?

Clarity C3 for 4.0 is a simple but powerful authoring tool that allows you to easily write and design your own interactive, multimedia CDROM (Access-based) training courses. The created course can be easily added to an existing library of Clarity courses and tracked with the Clarity Administrator. Any C3 for 4.0 course can also be used as a stand-alone course with no tracking capabilities.

Prerequisites for Using Clarity C3

- Knowledge of designing training courses
- Knowledge of audio, graphics and video production is helpful
- Familiarity with the Clarity product line (specifically the Clarity Administrator and Customease)
- Basic knowledge of Windows file management
- CDROM recording hardware and software to create course CDROMs

Features of Clarity C3

- Quickly build and preview course menu
- Build and preview numerous storyboard style/template combinations
- The storyboard creation process in C3 is similar to Customease within Clarity 4.0
- Storyboards make use of audio, graphic, and video assets for course interaction using existing Clarity course templates (Safety & Environmental, Human Resources, Skills, and HealthTrain)
- Storyboards also feature the ability to build hot spots/hypertext and randomized test banks
- Built-in help files aid in creating the course
- Course Creation Status bar at the bottom of the screen helps to track the course building process
- Course Finisher insures that all assets are in place for course completion
- Built-in reports help to organize created courses, storyboard details and hotspot/hypertext definitions
- C3 (version 1.0) Upgrade Utility provides a migration path to allow upgrade of these courses into the C3 for 4.0 version
